Das Königreich ist in 69 Provinzen (Provincia) und 284 Bezirke (Circondario) eingetheilt. Die Provinz-Hauptstädte sind durch fettere Schrift und doppelte Unterstreichung ausgezeichnet, die Bezirks-Hauptstädte durch einfache Unterstreichung. Die historischen Namen und die Namen von zusammengehörigen grösseren Landestheilen (Compartimenti territoriali), wie PIEMONTE, LOMBARDIA, UMBRIA etc. sind durch gesperrte ägyptische Schrift hervorgehoben.
Die Ortsbevölkerung ist durch Zeichen u. Schrift ausgedrückt, wie folgt:
ORTE von über 100000 Einw. – ORTE von über 50000 Einw. – Orte von über 20000 Einw.
Orte von über 10000 Einw. – Orte von über 5000 Einw. – Orte von unter 5000 Einw.
Eisenbahn in Betrieb u. im Bau – Chaussirte Strassen – Schiffahrts- u. Bewässerungs-Canal – Erzbischofs- u. Bischofssitz – Gebirgspass – Festung u. Fort – Leuchtfeuer – Seehafen u. Ankerplatz

Alphabetisches Namensverzeichnis.

Alphabetical nomenclature. — Nomenclature alphabétique. — Indice alfabetico dei nomi.

Zur Erleichterung der Auffindung eines Namens wird in diesem Verzeichnis auf die Trapeze verwiesen, welche durch das ausgezogene Gradnetz gebildet und an den Rändern jeder Karte durch grofse Buchstaben und Zahlen bezeichnet sind. Die dem Namen zunächst stehenden Zahlen bezeichnen die Kartenseite des Atlas, die Buchstaben und die auf diese folgenden Zahlen das Trapez, welches den betr. Namen enthält. Nur bei den Karten des Nord- und Südpols (Nr. 6 und 7) wird auf die durch die Längengrade gebildeten Trapezreihen verwiesen, welche durch Zahlen allein näher bezeichnet sind. Die Zeichen ⓐ, ⓑ, ⓒ u. s. w. deuten auf die Nebenkarten hin. In den gröfsern Nebenkarten sind die Trapeze durch kleine Buchstaben bezeichnet.

Jeder Name eines Ortes, Flusses u. s. w. ist im Verzeichnis nur einmal aufgenommen worden, und zwar ist der Name überall derjenigen Karte oder Nebenkarte entnommen, in welchem der betr. Gegenstand im gröfsten Mafsstabe gezeichnet ist; nur die Namen von grofsen Gebirgen, Ländern, Meeren, Flüssen u. s. w., welche sich über mehrere Karten oder viele Trapeze desselben Blattes ausdehnen, sind den Übersichtskarten entnommen. Die Ziffern und Buchstaben, durch welche auf einigen Karten, Raummangels wegen, Provinzen, Bezirke u. s. w. bezeichnet sind, und für welche in den Erklärungen des betr. Blattes eine Erläuterung gegeben ist, sind (in Klammern) den betr. Namen hinzugefügt worden. Namen, welche aus mehreren Worten bestehen, sind stets unter dem Eigennamen, nicht unter der Gattungsbezeichnung — z. B. Monte Rosa unter Rosa, Rio Negro unter Negro — aufgeführt; ebenso sind diejenigen Namen, welche gewöhnlich mit dem Artikel gebraucht werden, nur nach dem Namen, nicht nach dem Artikel geordnet worden; so ist Le Havre aufzusuchen unter H, El Fascher unter F. Die mit Saint, Sainte, San, Sankt, São, Santa, Santo zusammengesetzten Namen sind sowohl unter S, als auch nach dem Namen selbst aufgeführt. Die Namen sind, auch wenn sie im Atlas in den Endungen abgekürzt wurden, im Verzeichnis stets voll ausgeschrieben.

Die von dem deutschen und lateinischen Alphabet abweichenden Buchstaben der dänischen, rumänischen, slawischen u. a. Sprachen, z. B. å, č, ł, ll, ñ, ø, rr, š, ţ, sind nicht als besondere Buchstaben, sondern in der Reihenfolge des lateinischen Alphabets bei a, c, l, n, ö, r, s, t, eingeordnet worden. Namen, welche mit C oder c geschrieben werden, sind event. bei K oder k nachzuschlagen, und umgekehrt.

Namen, bei welchen ein erklärender Zusatz sich nicht findet, bedeuten stets Orte (Städte, Dörfer, Gemeinden, Seriben, Kraals u. s. w.); nur bei denjenigen Orten, deren Wortlaut eine abweichende Bedeutung hat, z. B. bei Zusammensetzung mit Mount, Rio u. a., bei den Endungen berg, feld u. s. w., ist stets die Erklärung *O* = Ort hinzugefügt. Bei wiederholt vorkommenden Namen ist stets ein Zusatz, welcher die Lage des betr. Gegenstandes (nach Land, Provinz, Flufs, Gebirge u. s. w.) genauer bestimmt, in Klammern hinzugefügt; bei gleichen Namen von Flüssen ist gewöhnlich der Name des Flusses, in welchen dieselben einmünden, als unterscheidendes Merkmal hinzugefügt. Für Erklärungen sind folgende leicht verständliche Abkürzungen angewendet worden:

a. = an, am, an der.
b. = bei, beim.
i. = in, im.
v. = von, vom.

To facilitate the finding of names, the reader is referred in the present nomenclature to the squares formed by the degrees of longitude and latitude and marked, on the border of each map, by capital letters and figures. The figures placed next the names, denote the page of the atlas, the letters with the following figures, refer to the square that contains the particular name. Only with regard to the maps of the North Pole and the South Pole (pages 6 and 7) the nomenclature refers to the files of squares confined by the degrees of longitude and marked only by figures. The signs ⓐ, ⓑ, ⓒ, &c. denote the inset-maps, on the larger of which the squares are marked by small letters.

Each name of a place, river, &c. has been inserted but once in the nomenclature, and its designation always corresponds with the principal or inset-map showing the particular object on the largest scale. Only the names of large chains of mountains, of large countries, seas, rivers, &c. which extend over several maps or over many squares of the same sheet, have been taken from the general maps. The figures and letters by which, on account of want of room, provinces, circuits, &c. are denoted on some maps, and the explanation of which is given on those maps themselves, have been added to the names (in a parenthesis). Names composed of several words, have always been inserted by the proper name, not by the noun appellative, e. g.: Monte Rosa, by Rosa; Rio Negro, by Negro. Likewise the names usually preceded by the article, have been placed, not by the article, but only by the very name itself; so Le Havre is to be looked after by H, El Fascher, by F. The names connected with Saint, Sainte, San, Sankt, São, Santa, Santo, have their place by the letter S as well as by the very proper name. In the nomenclature the names, even when abbreviated in the atlas, are always written in full length.

The letters of the Danish, Roumanian, Slavic and other languages which differ from the German and Latin alphabets, e. g.: å, č, ł, ll, ñ, ø, rr, š, ţ, have been inserted, not as particular letters, but in the order of the Latin alphabet, by the letters a, c, l, n, ö, r, s, t. Names written with C or c, are eventually to be looked for under K or k, and vice-versa.

Names that are not accompanied by an explanatory addition, always signify places (towns, villages, commons, kraals, zeribas, &c.); only to those places the names of which have a different meaning, (e. g. when there are connections with Mount, Rio, &c., or terminations such as „berg“ = mountain, „feld“ = field, &c.) the explanatory sign *O* = Ort (place) has been added. Uniform names which occur repeatedly, are always provided with an addition, in a parenthesis, serving to fix exactly the situation of the particular name. When there are uniform names of rivers, the explanatory addition is made by indicating the name of the river of which they are tributary. For the purpose of explications the following abbreviations have been employed:

a. = an (on, upon).
b. = bei (near).
i. = in (in, at).
v. = von (of).
z. = zu (to).
Bez. = Bezirk (District).
Bg. = Berg (Mount, Mountain).

Terr. = Territorium (Territory).
V. = Volk, Volksstamm (People, Tribe).

Pour faciliter la recherche des noms, nous renvoyons dans la présente nomenclature aux trapèzes formées par les degrés de longitude et de latitude et marquées sur le cadre de chaque carte par des lettres majuscules et des chiffres. Les chiffres placés en premier lieu après les noms indiquent la feuille de l'Atlas; les lettres avec les chiffres qui les suivent, se refèrent à la trapèze qui contient le nom respectif. Ce n'est que pour les cartes du pôle Nord et du pôle Sud (nos 6 et 7) que la nomenclature renvoie aux files de trapèzes limitées par les degrés de longitude et marquées seulement par des chiffres. Les signes ⓐ, ⓑ, ⓒ, etc. dénotent les cartes supplémentaires, sur les plus grandes desquelles les trapèzes sont marquées par des minuscules.

Chaque nom d'endroit, de fleuve, etc. ne figure qu' une seule fois dans la nomenclature, et la désignation s'adapte partout à la carte, soit principale soit supplémentaire, qui présente sur la plus grande échelle l'objet dont il s'agit; seulement les noms des grandes chaînes de montagnes, des grands pays, mers, fleuves, etc. qui s'étendent sur plusieurs cartes ou sur un grand nombre de trapèzes de la même carte, sont pris, pour leur désignation, sur les cartes générales. Les chiffres et les lettres qui, faute d'espace, indiquent sur quelques cartes des provinces, des districts, etc., et dont l'explication est donnée sur ces cartes mêmes, ont été ajoutés (en parenthèses) aux noms respectifs. Les noms composés de plusieurs mots ont toujours leur place sous le nom propre seul, et non pas sous le nom appellatif, p. e.: Monte Rosa, sous Rosa; Rio Negro, sous Negro. De même, les noms qui prennent ordinairement l'article, ont été rangés d'après le nom même seulement; ainsi Le Havre doit être recherché sous H, El Fascher, sous F. Les noms composés avec Saint, Sainte, San, Sankt, São, Santa, Santo, se trouvent insérés et sous la lettre S et sous le nom même. Dans la nomenclature tous les noms, lors même que leurs terminaisons sont abrégées dans l'Atlas, sont écrits en toutes lettres.

Les lettres des langues danoise, roumaine, slaves et autres qui diffèrent des alphabets allemand et latin, p. e.: å, č, ł, ll, ñ, ø, rr, š, ţ, ont été insérées non pas comme lettres particulières, mais dans l'ordre de l'alphabet latin, près des lettres a, c, l, n, ö, r, s, t. Les noms qui s'écrivent avec C ou c, doivent éventuellement être recherchés sous K ou k, et vice versa.

Les noms qui ne sont pas accompagnés d'addition explicative, désignent toujours des endroits (villes, villages, communes, seribes, kraals, etc.); ce n'est qu'aux endroits dont le nom a une signification différente (citons p. e. les noms composés avec Mount, Rio etc. et les noms avec les terminaisons „berg“ = mont, „feld“ = champ etc.) que le signe explicatif *O* = Ort (endroit) a été ajouté. Les noms conformes qui se présentent à plusieurs reprises, sont toujours pourvus d'une addition, en parenthèses, qui précise (d'après le pays, la province, le fleuve, la montagne etc.) la situation de l'objet respectif. Dans ce sens, la situation des fleuves est généralement précisée par l'indication des fleuves dont ils sont affluents. Comme additions explicatives les abréviations suivantes ont été employées:

a. = an (sur, à).
b. = bei (près de).
i. = in (en, dans, à).
v. = von (de).
z. = zu (à).
Bez. = Bezirk (District).
Bg. = Berg (Mont, Montagne).
Bge. = Berge (Montagnes).
Bk. = Bank (Banc, Banc de sable).
Br. = Brunnen (Fontaine, Puits).
Bzhpt. = Bezirkshauptmannschaft (Territoire administré par un capitaine de district).
C. = Cap.
Col. = Colonie.
Ct. = Canton.
Cty. = County (Comté).
Dep. = Département.
Dist. = District.
Dj. = Djebel (Mont, Montagne).
Fl. = Flufs (Rivière, Fleuve).
Ft. = Fort, Forteresse.
Ftm. = Fürstentum (Principauté).
G. = Golf (Golfe).
Geb. = Gebirge (Montagnes).
Ghztm. = Grofsherzogtum (Grand-duché).
Gouv. = Gouvernement.
Gfsch. = Grafschaft (Comté).
Hztm. = Herzogtum (Duché).
I. = Insel (Ile).
In. = Inseln (Iles).
Kgr. = Königreich (Royaume).
Kom. = Komitat (Comitat).
Krhpt. = Kreishauptmannschaft (Territoire administré par un capitaine de cercle.
Ld. = Land (Pays).
Ldsch. = Landschaft (Paysage, Pays).
MB. = Meerbusen (Golfe, Baie).
Mt. = Mont, Mount, Mountains.
P. = Pafs (Défilé, Col, Passage).
Prov. = Provinz (Province).
Q. = Quelle (Source, Fontaine).
Rep. = Republik (République).
Rgbz. = Regierungsbezirk (Gouvernement, Régence).
Ru. = Ruine (Ruines).
Terr. = Territorium (Territoire).
V. = Volk, Volksstamm (Peuple, Tribu).

Per facilitar la ricerca dei nomi, si rimanda nel seguente indice ai trapezi formati dai meridiani e dai paralleli, e segnati sui margini di ciascuna carta mediante lettere majuscole e cifre. Le cifre, che stanno vicine dopo i nomi, indicano la pagina dell' atlante; le lettere e le cifre, che le seguono, si riferiscono al trapezio che contien il nome rispettivo. Solamente riguardo alle carte delle regioni artiche ed antartiche (pagine 6 e 7) si indirizza alle file di trapezi confinate dai meridiani e segnate mediante cifre soltanto. I segni ⓐ, ⓑ, ⓒ ecc. si riportano alle cartine aggiunte. Nelle più grandi di queste cartine i trapezi sono segnati con lettere minuscole.

Ciascun nome di luogo, di fiume ecc. è dato solamente una volta nell' elenco, ed è sempre preso dalla carta principale o dalla secondaria sulla quale l'oggetto rispettivo è rappresentato in maggiore scala; i soli nomi delle regioni, delle grandi zone montagnose, dei mari, dei fiumi, che si estendono sopra parecchie carte o sopra molti trapezi di una carta, sono desunti dalle carte generali. Le cifre e le lettere, che su alcune carte, per mancanza di spazio, indicano province, distretti ecc., e la cui esplicazione è data sulle carte rispettive, sono aggiunte ai nomi (in parentesi). I nomi, che constano di parecchi vocaboli, sono sempre dati col nome proprio, e non con quello generico; così, ad esempio, Monte Rosa è a cercarsi sotto Rosa; Rio Negro, sotto Negro. Egualmente i nomi formati cogli articoli sono ordinati secondo il nome vero, e non secondo l'articolo; ad esempio, Le Havre debbesi cercare alla lettera H; El Fascher, alla lettera F. I nomi composti con Saint, Sainte, San, Sankt, São, Santa, Santo, si trovano tanto alla lettera S che sotto il nome stesso. I nomi, quand' anche siano abbreviati nell' atlante, sono sempre scritti nell' indice con tutte le lettere.

Le lettere delle lingue danese, romanza, slave ed altre, che differiscono dagli alfabeti tedesco e latino, ad esempio: å, č, ł, ll, ñ, ø, rr, š, ţ, sono ordinate, non come lettere particolari, ma in ordine dell' alfabeto latino, appresso alle lettere a, c, l, n, ö, r, s, t. I nomi, che si scrivono con C o con c, s'hanno, eventualmente, da cercare sotto la lettera K o k, e viceversa.

Quei nomi, presso i quali non si trova un' aggiunta esplicativa, indicano sempre luoghi, (città, villaggi, comuni, seribe, kraals e simili); soltanto accanto a quei nomi di luoghi il cui suono letterale ha differente significato (ad esempio le composizione con Mount, Rio ecc., o i nomi che si terminano colle voci „berg“ = monte, „feld“ = campo) sempre si è posta la spiegazione *O* = Ort (luogo, località). A nomi conformi, che si trovano più volte, si è sempre apposta, in parentesi, un' aggiunta per meglio determinar la posizione del relativo oggetto. A tale intento, presso i nomi dei fiumi si trova l'indicazione del fiume del quale sono tributarii. Per le interpretazioni si fece uso delle seguenti abbreviature:

a. = an (su, sul, sulla).
b. = bei (presso, presso il).
i. = in (in, nel, nello).
v. = von (da, dal, dallo).
z. = zu (a, alla).
Bez. = Bezirk (Distretto).
Bg. = Berg (Monte).
Bge. = Berge (Monti, Montagna).
Bk. = Bank (Banco, Banco di sabbia).
Br. = Brunnen (Fontana, Pozzo).
Bzhpt. = Bezirkshauptmannschaft (Capitaneria distrettuale).
C. = Cap (Capo).
